PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience building full-stack web applications using Java, Python, JavaScript, React.js, Node.js, Express.js, and modern database technologies. Proficient in developing scalable RESTful applications, designing efficient backend systems, and collaborating on real-world software projects. Passionate about solving complex problems, learning emerging technologies, and contributing as a Software Engineer by building efficient, reliable, and user-centric software solutions.

EDUCATION

Parul University

Bachelor of Technology in Computer Science and Engineering

Vadodara, Gujarat

2023 – 2027

– CGPA: 7.83 / 10

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, Authentication

Databases: MongoDB, PostgreSQL, MySQL

Developer Tools: Git, GitHub, Docker, Vercel, VS Code, Postman

Core Computer Science: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), Database Management Systems (DBMS), Operating Systems, Computer Networks

PROJECTS

TravelLoop – Travel Planning Platform

TypeScript, Next.js, React.js, Supabase, PostgreSQL, Tailwind CSS, Vercel

- Built a premium full-stack travel planning platform using Next.js and Supabase for seamless itinerary management.
- Implemented secure itinerary sharing, user authentication, and dynamic budget tracking to enhance collaborative travel planning.
- Designed a responsive user interface and managed the complete development lifecycle, including PostgreSQL database design, backend integration, and deployment on Vercel.

Civic Issue Tracker – Smart Urban Maintenance System

Next.js, React.js, Tailwind CSS, TypeScript, Node.js, Supabase, Leaflet

- Developed a full-stack civic issue reporting platform to streamline urban maintenance and infrastructure management.
- Integrated a Computer Vision pipeline with a centralized administrative dashboard for automated issue classification and monitoring.
- Implemented real-time issue tracking, hazard detection, and automated task assignment to improve response time for municipal authorities.

Sentinel – Gig Worker Safety Platform

Next.js, React.js, Tailwind CSS, Radix UI, Supabase, PostgreSQL, Docker, Vercel

- Developed a full-stack safety and monitoring platform for gig workers and delivery personnel.
- Implemented real-time monitoring and risk assessment features to improve operational safety and incident awareness.
- Designed a scalable full-stack architecture supporting real-time monitoring and operational workflows using modern web technologies.

CERTIFICATIONS

- | | |
|--|------------------------------|
| • AWS Academy Graduate | <i>Amazon Web Services</i> |
| • AWS Skill Builder Certification | <i>Amazon Web Services</i> |
| • IBM SkillsBuild Badge | <i>IBM</i> |
| • Hashgraph Developer Certification | <i>Hashgraph Association</i> |

ACHIEVEMENTS & LEADERSHIP

Achievements

- Secured **3rd Place** in **Code Optics**, a university-level competitive programming competition organized by Parul University.
- Selected among the **Top 1000 Teams** in the **India Innovates 2026** National Innovation Challenge for developing an innovative software solution.
- Participated in multiple national and university-level hackathons including **Smart India Hackathon (SIH)**, **Vadodara Startup Festival (VSF 6.0)**, and **Tech Expo 2024**, collaborating on innovative software solutions.

Leadership Experience

- Coordinated team activities during **Vadodara Startup Festival (VSF 6.0)** by assigning responsibilities, tracking project progress, and ensuring timely completion of deliverables.
- Served as an organizing team member for **Tech Expo 2026** and the **PU Code Hackathon**, contributing to event planning, volunteer coordination, and successful execution.
